DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6-9, 15-18, 20, 21 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (3,759,425). Lee teaches a device for the metered administration of a fluid comprising a container (24) having a piston (32) for administering fluid through an outlet, a catheter connected to the outlet of the container having a front end and will inherently contain an injection needle. He teaches a valve (i.e. 53) positioned between the outlet (52) and injection needle that can be attached to the distal end, the valve having an inlet and outlet end wherein flow of fluid is permitted from the outlet to the injection needle when pressure is exerted on the inlet end of the valve exceeds a pressure on the inlet end caused by the pressure of the fluid drug. Lee teaches the valve body that seals the enclosing of the aperture in response to pressure that is passive in nature. It should be noted that other embodiments of Lee may read on Applicant's claim limitations.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 2, 6-9, 15-18, 20, 21 and 26 have been considered but are moot in view of the new ground(s) of rejection.
